### CONFERENCE AGENDA

This Conference will focus on the military, political and social history involved in a critical period of the State of Missouri: that time of September and October of the year 1864. Much of the American Civil War's body of knowledge is focused upon the battlefields East of the Mississippi River. Much more information is available to an understanding of the War's efforts by learning of the events occurring in the State of Missouri. The goal of this Symposium will be to illuminate such contribution of Missouri to our nation's history by a study of the events during September and October of the year 1864 when the possibility existed for Confederate control.
